Education

| 2015-2019 | Informatics Engineering | UDG, CUCEI |
| 2020 | Basics of Web Development | Google Certification |

Laboral Experience

Continental [Application Support] (18/06/2019 – 30/04/20)
I worked as web developer, making applications for the improvement of local management's flow (HR, Finance and Local IT areas).

- **MyLap** – Embed system of laptops management for entrance and exit, created with Laravel & Jquery, this tool reached the 200% of effectivity of entrance flow as it was expected.
- **CENSO Bienestar** – A mailbox for complaints and suggestions, the system distribute its user's posts with HR by sub areas and cases, it reaches the approbation for international use (before only in local IT), created with Django.
- Other Laravel / Django web applications.

Scholar [Full Stack development role] (10/2019 – 8/2020)
- **PROFACAD** – Development of a course's platform, made on NodeJS and Angular for scholar administration.

Contalite & Roistom [Full IT Engineer] (02/06/2020 – Now)
- **Contalite & Facturalite APPs –** Two webapps for invoice stamp, contains a electronic payments system, profile management for the user and its clients, responsive design and a simply & better way to stamp, upload and download invoices from SAT.
- **Support Management**- IT inventory control, users management, and server & network basic configuration.

Personal (02/2020 - Now)
Frontend, backend, testing and DB architecture for some applications, specifically…
- **Libelula –** A website of bugs knowledge, is being done with Golang as backend and React for frontend.
- **RoadMap generator** – A tool for design custom roadmaps for production of assets and its clients relationships status, made with Laravel and VueJS.
- Making my own website and other systems for my GitHub.

Languages

- C, C++, C#, Java, Python, JS, PHP, Golang.
- CSS, Bash, HTML, SASS.

Frameworks

- Laravel, Django, Flask, NodeJS & .NET.
- Angular, React, VueJS, Gatsby & jQuery.
- Ionic

Complements

- Style (Bootstrap 4, Material UI)
- SQL (MS, MySQL, Oracle, SQLite, PostgreSQL)
- MongoDB
- Basics of Dockers
- PWA Architecture
- VPS administration (SSH, cPanel and SFTP)
- GIT
- SAT Invoice stamp.

Additional

- Photoshop (Mid)
- After effects and Adobe XD (Basic)
- English B2 level
- Data mining algorithms (Basic).
- Data structures behavior (linked lists, binary trees, graphs, hash tables …).
- WordPress.
